

PROJECT NAME: Summit County Water Supply

RECIPIENT: Weber Basin Water Conservancy District

LOCATION: Layton, Utah

PURPOSE: Conduct studies and engineering designs of water development and water importation projects for Summit County, Utah. Projects may take guidance from the U.S. Bureau of Reclamation 2006 Snyderville Basin Water Supply Study and or studies defined by Weber Basin Water Conservancy District in behalf of its customers through out all Summit County. Various environmental and preliminary studies have been conducted leading to the initiation design and construction of the Snyderville Basin Water Supply Project. Additional studies, guidance and design are needed to meet the projected water supply needs of all parts of the rapidly increasing population of Summit County.

This project will identify economically feasible and environmental friendly methods for developing a long-term water supply for the citizens of Summit County.

AMOUNT: \$500,000
